

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts can be specifically marked to be used in dangerous places. A labeled truck denotes the design has met the minimum requirements of ANSI/UL 558 intended for engine powered forklifts or ANSI/UL 583 intended for electric lift trucks for the type of label placed.

Applications for marked lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Areas of Use, Maintenance and Operation, and Type Designations. Check with your local insurance provider and Fire Marshall for more information on the approved uses of industrial powered lift trucks in your application.

If the particular forklift satisfies the outlined criteria, labels can be attached. A labeled lift truck will show the type of designation located on the nameplate and will have a properly corresponding label put.
