

Clark Forklift Parts

Clark Forklift Parts - At this time, there are at least 350,000 Clark forklifts performing worldwide, and in excess of 250,000 in use in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual items built for 20 distinctive designs of forklifts and automated equipment. Your local Clark Dealer is your total source for availability of all your components requirements provided by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Worldwide, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

Clark proudly remains an progressive leader of the industrial equipment industry, pioneering protection features such as the operator restraint system. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a relentless objective to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental limitations, thus placing them in a dominant industry position.

Clark has selected the extremely economical and advantageous system of "Lean Manufacturing" for its assembly plants and application of resources. This system was established to acknowledge the most effective method of production plant stewardship and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing expenses. The new value engineering program combines modern product improvement and delivers superior consumer support and service within the industry.
