

## Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental company that comprises of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer requirements.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving lift truck supplies and materials handling equipment. This system allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively features 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle designs range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest rising forklift and lift truck corporation in the North American market, due to its outstanding level of product performance and their persistently high level of consumer support and service given to all Doosan Infracore Lift Truck users. The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a national equipment expansion project. Initial sales of this manufacturing equipment focused on large business groups, the armed services and on state-run companies. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of considerable expansion of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling industry. This venture greatly expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a new plant which helped set up the company for the fabrication of high end added-value products suited for export. In 1993, the company had a global sales system and started exporting designs they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
