

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, has been the best selling lift truck provider in the U.S. This company has been headquartered out of Irvine, California for well over 40 years, providing a wide-ranging line of quality lift trucks. With a remarkable reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to continuous progress, and its environmental systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The head of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's success comes from its dedication to produce high quality lift trucks while offering exceptional customer assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." • TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is amongst the magazines prestigious World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other corporations and no other lift truck manufacturer can equal Toyota's history of caring for the natural environment while concurrently encouraging the economy. Environmental accountability is an important characteristic of corporate decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more intricate 2010 emission standards. The end invention is a lift vehicle that produces 70% fewer smog forming emissions than the present Federal standards allow.

Also in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their commitment to the environment. Upwards of 57,000 trees have been planted in community parks and national forests damaged by natural reasons such as fires, as a result of this partnership. 10,500 seedlings have also been spread through Toyota Industrial Equipment's network of sellers to non-profit organizations and local consumers to help sustain communities all over the U.S.

Toyota's lift trucks offer superior stability, visibility, productivity, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS"®, helps decrease the chance of mishaps and injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment breakage.

System Active Stability is able to sense circumstances that might lead to lateral unsteadiness and potential lateral overturn. When one of these factors have been sensed, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding durability.

SAS was first launched to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS has been integrated into nearly all of Toyota's internal combustion products. It is standard equipment on the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with compulsory operator instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's rigid principles extend far beyond the technology itself. The company believes in offering extensive Operator Safety Training services to help clients meet and exceed OSHA standard 1910.178. Instruction services, videos and an assortment of resources, covering a wide scope of topics-from individual safety, to OSHA regulations, to surface and load conditions, are accessible through the supplier network.

Toyota has maintained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are manufactured in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service parts, with the whole investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and consumers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a instruction center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most complete and inclusive customer support and customer service in the industry. The company's new and Certified Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to ensure total client satisfaction.
